OBJECTIVE

Looking for a position where I can augment my knowledge and skills while contributing to the success of the organization.

WORK EXPERIANCE (November 2024–Present)

Tata Consultancy Services Limited- Trivandrum, India

Working as a System Engineer (Grade-C1), gained proficient knowledge in Java, JDBC(Java Database Connectivity), Azure Cloud Platform & ServiceNow related tasks.

INTERNSHIP (January 2024 –March 2024)

Indian Space Research Organisation- Trivandrum, India

Worked on a research project entitled "Automated Identification of Venusian Volcanic Features using Convolutional Neural Networks" as a Project Trainee.

PROJECTS

Leveraging Verkel trees for enhanced cloud security and data integrity in Blockchain

Developed a cloud integrity verification system to secure cloud storage by implementing Blockchain technology and Verkel tree data structure.

Churn Prediction System

Developed a high-accuracy churn prediction system using Machine Learning algorithm employing MLP, Naive Bayes and XG Boost. It worked well and resulted in a better prediction than other algorithms.

Smart Parking System

Developed a web-based smart parking system using ESP32, IR sensors, Magnetometer sensor and Cloud platform.
